Hebrew – Native speaker

English – fluent

skills

- **Cyber Fundamentals** – Protocols | Windows Network Tools | Networking Fundamentals OSI | Kali Linux| Text Manipulation.
- **Automation** – Bash | Python.
- **Network Research** – Network Services | Network Protocols Analysis | Scanning Tools Wireshark | TCP/IP | Offline\Online Brute-force | Trojans | Firewalls.
- **Windows Forensics** – Carving Tools | Steganography | Volatility |Memory Analysis Malware Analysis|Windows Events.
- **Penetration Testing** – Enumeration |Exploitation| Post Exploitation| Payloads | Social Engineering | WebApp Security.
- **Network Security** – Network Attacks | Domain Exploitation | PowerShell | Domain Security Cryptography**.**
- **Soc Analyst** – SIEM System (ELK, Splunk) | IPS/IDS | Log Analysis | Event Analysis | Firewalls Threat Hunting | Incident Response.

Education

John Bryce | Tel Aviv, Israel	2025 - 2026
Defensive Cyber Security course	
John Bryce | Tel Aviv, Israel	2026 - 2027
Offensive Cyber Security course (RTX)	

Personal summary

- **Highly motivated** to work, grow, and integrate into the cybersecurity field.
- Experience in **teamwork and cooperation**
- **Strong work ethic** with a proven ability to self-learn and adapt to new technologies
- **Excellent problem-solving** skills
- Great with multitasking and **working under pressure**

Seeking an entry-level opportunity to work in a cybersecurity environment and gain hands-on experience, and develop more practical skills.

Projects

Network Research Anonymous Enumeration: Automates the detection of exposed SSH services and and validate access controls.

Windows Forensics Memory File Analyzer: Parses a memory file with a lot of tools and gives detaled breackdown.

Python Log Parser: parses the auth.log file and pinpoints the breaches and uses of suspicious keywords.

PT Vulnerability Scanning: Automation to map services and vulnerabilities on the entire ip range
